

A Green Revolution in Land Drainage

Aquadyne is a unique drainage medium manufactured from 100% non toxic recycled material.

FAST AND EASY INSTALLATION

It is the cost-effective and rapidly installed solution to many of the serious drainage problems commonly encountered. It is available in 1 metre lengths, so installation requires no heavy machinery. The open pore structure fights against clogging, settlement and infiltration

failure. The material is lightweight, yet extremely durable, with a flow rate ten times greater than sand.

THE HUGE BENEFITS OF AQUADYNE ARE BEING ENJOYED RIGHT ACROSS THE UK

Here are just some of the users
